EXAMINER

SNIDER, THERESA T

ART UNIT PAPER NUMBER

1744

DATE MAILED: 09/26/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/865,766

Applicant(s)

THATCHER ET AL.

Examiner

Theresa T. Snider

Art Unit

1744

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 June 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 and 12-14 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 and 12-14 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____ 6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1-8 and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thatcher et al. in view of Nagayama et al., Warren et al. and Wulff.

Thatcher et al. discloses a similar machine however fails to disclose a scrubber housing, a buffer belt and clutch or a flexible bladder tank system.

Thatcher et al. discloses a frame (fig. 1, #101).

Thatcher et al. discloses a first scrubber attached to the frame means including a first scrubber pad and a first gear box (fig. 1, #107a, col. 6, lines 19-20). Nagayama et al. discloses a scrubbing machine having a scrubber with a housing (fig. 4, #6, col. 6, line 41-42). It would have been obvious to one of ordinary skill in the art to provide the housing of Nagayama et al. in Thatcher et al. to provide for a means to prevent splashing by the scrubber.

Thatcher et al. discloses a buffer attached to the frame including a buffer pad and gear box (fig. 1, #106a and col. 6, lines 16-17). Warren et al. discloses a buffing machine using a buffer belt and clutch (abstract, col. 1, line 66-col. 2, line 5). It would have been obvious to one of ordinary skill in the art to provide the belt and clutch of Warren et al. in Thatcher et al. in view of Nagayama et al. to allow for operation at adjustable speeds.

Thatcher et al. discloses a squeegee attached to the frame between the scrubber and buffer (fig. 1, #304).

Thatcher discloses a motor means mounted on the frame for powering the scrubber and

Art Unit: 1744

buffer (fig. 1, #103).

Thatcher discloses a tank system for clean water and floor residue in communication with the squeegee (col. 4, line 67 and col. 5, lines 1 and 47-57). Wulff discloses a scrubbing machine with a fluid bladder tank system for clean water, detergent and floor residue that is in communication with a squeegee (col. 1, lines 63-68, col. 2, lines 43-49, col. 3, lines 5-12 and 25-29). It would have been obvious to one of ordinary skill in the art to provide the flexible bladder tank system of Wulff in Thatcher et al. in view of Nagayama et al. and Warren et al. to provide for a system where the center of gravity stays constant as the clean fluid is depleted and residue is collected to allow for a constant load on the scrubbers.

With respect to claim 2, Thatcher et al. discloses the motor means being an engine (col. 5, lines 19-23).

With respect to claim 3, Thatcher et al. discloses a second scrubber attached to the frame including a second scrubber pad and a second gear box (fig. 1, #107b, col. 6, lines 19-20). Nagayama et al. discloses a scrubbing machine having a scrubber with a housing (fig. 4, #6, col. 6, line 41-42). It would have been obvious to one of ordinary skill in the art to provide the housing of Nagayama et al. in Thatcher et al. in view of Warren et al. to provide for a means to prevent splashing by the scrubber.

With respect to claim 4, Thatcher et al. discloses a vacuum (col. 5, lines 35-45).

With respect to claim 5, Thatcher et al. disclose a single drive wheels (fig. 1, #105). Nagayama et al. discloses a cleaning machine having two drive wheels (col. 3, lines 35-39). It would have been obvious to one of ordinary skill in the art to provide the second drive wheel of

Art Unit: 1744

Nagayama et al. in Thatcher et al. in view of Warren et al. to allow for a broader base of support and greater stability.

With respect to claim 6, Thatcher et al. discloses first and second stability wheels (col. 7, lines 19-21).

With respect to claim 7, Nagayama et al. discloses a cleaning machine with a control panel (col. 3, lines 49-51). It would have been obvious to one of ordinary skill in the art to provide the control panel of Nagayama et al. in Thatcher et al. in view of Warren et al. to have a way of displaying to an operator the operation states and conditions of the machine.

With respect to claim 8, Thatcher et al. disclose the frame being made of steel (col. 7, lines 48-49).

With respect to claim 11, Thatcher et al. discloses the buffer including a buffer pad and gear box (col. 6, lines 16-17).

With respect to claim 12, Thatcher et al. discloses the squeegee including a squeegee mount and blade (col. 5, line 46).

With respect to claim 13, Thatcher et al. discloses the engine being a propane engine (col. 5, line 22).

With respect to claim 14, Thatcher et al. discloses the engine being an internal combustion engine (claim 1,B). Thatcher et al. discloses a vacuum/blower(col. 4, lines 65-66). It would have been obvious to one of ordinary skill in the art to determine the most appropriate elements to work in conjunction with the engine of Thatcher et al. in view of Nagayama et al. and Warren et al. to allow for the most effective operation, no matter where the device is to be used.

Art Unit: 1744

Response to Arguments

3. Applicant's arguments with respect to claims 1-8 and 12-14 have been considered but are moot in view of the new ground(s) of rejection.

It is noted that it is not clear from the figures(fig. 3, #302) or the specification(paragraph 0057) what Applicant considers a 'fluid bladder tank system'. Is it a storage system constructed solely of flexible bladders or is it storage system having flexible bladders and tanks? Are all of the fluids contained in a single storage receptacle or are they stored in separate receptacles but operate together as a 'system'.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Johnson et al. and Anthony et al. disclose scrubber machines having flexible bladder tank systems.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theresa T. Snider whose telephone number is (703) 305-0554.

The examiner can normally be reached on Monday-Wednesday-Friday (6:30AM-3:00PM).

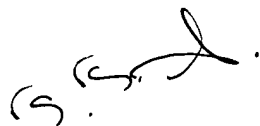

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J. Warden can be reached on (703) 308-2920. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
